

## **ACRE Partners with WaveLynx Technologies to Drive Mobile Access Control Growth Across its Brands**

FOR IMMEDIATE RELEASE

**LAS VEGAS, October 14, 2020** — [ACRE](#), a global leader in providing security products and solutions for the access control, intrusion, smart traffic and video surveillance markets, announced today that the ACRE brands – [RS2](#), [Vanderbilt](#) and [Open Options](#) – will launch ACT ID, a new cloud-based mobile credential application that enables organizations to utilize both iOS and Android smartphones with existing WaveLynx multi-technology readers for secure access to doors in office buildings, government facilities, healthcare institutions, schools, residences and a growing variety of enterprises.

ACT ID features zero-touch, cloud-issued credentials for enrollment into a user’s access control system.

The application does not require any subscriptions or fees, making it an extremely flexible and affordable solution that allows organizations to transition to mobile access at their own pace.

“ACRE and its brands provide some of the industry’s most sought-after access control systems and solutions for customers across a variety of markets,” said Laurie Aaron, Executive Vice President, WaveLynx Technologies. “Through this integration, we’re able to provide additional functionality and risk-free mobile access solutions for end users to adopt as they update and expand their access control systems.”

“Mobility is an integral part of the goal of forward-thinking enterprise organizations, as more organizations look for way to leverage more touchless access control and seamless visitor management tools,” said Kim Loy, Chief Product Officer, ACRE. “Partnering with WaveLynx across the ACRE organization allows our brands to capitalize on this demand from the market and diversify their ability to provide secure, convenient mobile security options to partners and customers alike.”

### **About ACRE**

ACRE is a global leader in the delivery of integrated technologies and services. Since its formation in 2012, ACRE has played an instrumental role in the development and implementation of security technology initiatives on a global scale.
